

WHAT TO INCLUDE?

If you need advice, guidance or support, email our Interventions email address and we will get back to you as soon as we can.

It would be really helpful if you could include:

The age of the young person.

Your concerns.

Any learning disabilities/ mental health diagnosis.

If they admit culpability for the incident/s.

We will request further information from you following your email, however it allows us to start working on interventions if you provide the above information.

If you need to report
cruelty or neglect to
animals then call our
NCC on 0300 1234 999

New activities are
being developed to
encourage young
people to think more
about their attitudes
towards animals

Any feedback at all is always greatly appreciated.

If you ever do use any of our ideas or resources, please do send a quick email to let me know how it went. We really do want to know – even if it's bad!!
